

CyberSecurity and EH Mentorship

Your Launchpad to a Cybersecurity Career

Objective:

Each project is designed to produce tangible deliverables, including documentation, reports, diagrams, dashboards, and evidence suitable for showcasing on GitHub and discussing during cybersecurity interviews. By working through these projects, participants will gain the knowledge and skills necessary to perform thorough security assessments, identify vulnerabilities, and understand the importance of proactive cybersecurity measures.

Hands-On Projects:

1. **Identity & Access Management (IAM) On-Prem**
2. **Identity & Access Management (IAM) On-Cloud (AWS)**
3. **Linux Security**
4. **Vulnerability Management**
5. **Cloud Security Assessments**
6. **Penetration Testing**
7. **SIEM & Detection Engineering**
8. **Threat Hunting**
9. **Security Governance & Risk Management**
10. **Phishing Awareness Campaign Simulation**
11. **Phishing Email Analysis**
12. **Threat Hunting Using Mitre Att&ck**
13. **Threat Modeling using Threat Dragon and Windows Threat Modeling Tool**
